 (734)-730-2743

1929 Plymouth Rd. Apt # 4012, Ann Arbor, MI 48105

Skills

Languages – C++, C, MATLAB, Python, Java, MySQL

Web design – JavaScript, React.js, Vue.js, HTML, CSS, Google Analytics

IDE and Tools – Github, Gitlab, Agile, Visual Studio, VS Code, XCode, Docker, Linux, Bash, Git, SolidWorks, Siemens NX, Teamcenter

Awards - **Dean's List (2018 - 2019)** | **University Honors Award (2018 - 2019)** | **Pi Tau Sigma** – Honor Society

Experience

ITHAKA

August 2021 – Present

Ann Arbor, MI

Software Engineer Intern (Full Stack Role for FORUM web app)

- Single handedly coded a mapping interface for pairing metadata with field types that reduced user interaction by about 40% and reduced the development cycle of the MVP by about 3 weeks.
- Interacted with users and watched several UI usability tests to create designs for development for at least 30 total hours after work.
- Created a rotate image feature that allowed users to rotate and publish images to the JSTOR web app, for about 50% of images.
- Solved prod issues and improved workflows for web app, which is tightly integrated with AWS, using Python and Vue.js and unit tests.

DeepMap Inc.

January 2021 – Present

Ann Arbor, MI

Software Engineer (TechLab at MCity 2020-2021 Cohort Member)

- Optimized vehicle routing using Google's OR tools to improve map navigation by providing color feedback for road changes.
- Created a tool to parse map output in JSON format to automate initial analysis, which reduced the development cycle by 1.5 months.
- Coded an interactive HD map using the networkx library, to show the path of traversing between roads and total road changes.

Innoviz Technologies

August 2020 – December 2020

Ann Arbor, MI

Software Engineer (TechLab at MCity 2020-2021 Cohort Member)

- Implemented a RESTful python controller that uses LiDAR to detect pedestrians, that may save 10,000s of lives in proving safety.
- Successfully integrated LiDAR hardware with perception software and used the MCity infrastructure API to change traffic lights.
- Used MCity traffic light APIs to relay real time data to controller, which allowed us to meet 100% of our project's KPIs.

Michigan Electric Racing (Formula Electric FSAE Team)

August 2018 – November 2020

Ann Arbor, MI

Suspension Analysis Lead

- Analyzed 1000s of tires data points for 2020 racecar using MATLAB plotting. The best decision out of 18 choices was made.
- Lead the team that selected and mounted potentiometer sensors, to analyze data and improve 70% suspension designs.
- Designed and analyzed suspension using Siemens NX and ANSYS. Manufactured jigs and components using Mill and Lathe.

Projects

LearnBud Web App

June 2021 – August 2021

Ann Arbor, MI

Programmer

- Created a Flask web app, using a MySQL database and a React.js UI, that dynamically matched students with similar interests.
- Used AWS RDS database with a MySQL setup to store data, and transform a google forms doc into a web app.
- Developed a backend service in Python using REST APIs to group students with similar interests.

Drone Delivery

April 2021 – May 2021

Ann Arbor, MI

Programmer

- Created a tool that implemented MST algorithms, such as Prim's or Kruskal's, to deliver packages in a provided graph.
- Implemented a branch and bound algorithm that pruned branches, and improved the run time and accuracy of the traversal.

Command Line Euchre

May 2020 – June 2020

Ann Arbor, MI

Programmer

- Utilized C++ to make a command-line interface for Euchre, a card game, using classes and polymorphic players.
- Developed complex, random bot strategies to simulate games, that were tested using unit test macro frameworks.

Piazza Post Classifier

May 2020 – June 2020

Ann Arbor, MI

Programmer

- Built a program that uses a machine learning algorithm to classify posts on Piazza, a website for asking questions, by grouping together posts that have similar key words and sentences. Tested extensively using unit test frameworks.

Autonomous Drones Course Navigation

August 2018 – December 2018

Ann Arbor, MI

Programmer (Team of 4 members)

- Coded a drone to autonomously navigate a maze in C++ using LiDARs, and implemented a PID control and response filters.

Education

University of Michigan, Ann Arbor

Ann Arbor, MI

Bachelor of Science in Engineering

Graduating in 2023

Major: Computer Science

GPA: 3.63/4.00

Clubs/Programs – TechLab at MCity, Materials Lab, Michigan Electric Racing, IEEE, Pi Tau Sigma, Bursley Multicultural Council
